Manufacturing Status for the ViriMASK™, Mask & Filter

ViriMask Ltd is pleased to announce that it has identified a suitably credentialed manufacturing partner for ViriMask™ Mask and Filter production. Oneg HaKarmel Ltd has a long and solid history of manufacturing medical devices for the operating theatre and emergency medicine. The Company's Quality Management system is certified according to ISO13485:2016, and the company's other products are certified according to MDD and FDA requirements.

Further, the first batch of the initial order of >500 ViriMask Masks and Filters has been delivered by Oneg HaKarmel Ltd to ViriMask product team. The Company can confirm that 95% of the units passed incoming inspections and the company's team are very pleased with the performance of these units.

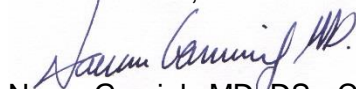

The units will be deployed in a verification and validation program as company planned to obtain CE mark.

The delivery, and acceptance of these units represents the achievement of a significant milestone in the manufacturing and certification process. Production volumes will ramp up over the coming weeks with the full quantity of >5000 masks and >27.000 filters expected to be available to ViriMask by early July 2020.

The Company is planning to submit the Technical File representing the entirety of the documents describing ViriMask™ to demonstrate that the product will perform safely and achieve the stated performance claims for its intended use.

As of the process, ViriMask™ will undergo the performance validation tests to demonstrate compliance with EN136 and EN143 standards by INSPEC International Ltd, (UK) which is also planned to serve as a company Notified Body.

Best of Health,

Noam Gavriely MD, DSc CEO and CMO
